WELCOME TO THE COMMUNITY

FINDING MEANING IN THE CHAOS

In the 12 years since I started streaming — and especially in the 4 years since I rebranded as Droogle — a *lot* of features and systems have been built for this channel. It can be a lot for newcomers. This guide is here to help you find meaning in the **CHAOS**.

From day one my focus has been interactivity: if you're live on Twitch, that's what it's all about. Pretty much everything in here is a way for **you** to change what happens on stream.

YOUR FIRST STREAM IN 6 STEPS

1 Just hang out

Everyone earns **Nuts** every 10 minutes — lurkers too. Type `!sack` to see your Nuts, hours and score.

2 Grab your Pom Poms

Pom Poms are channel points. Click the bonus chest when it pops up and spend them on redemptions.

More ▸

3 Pick a side

Heal Droogle or hit him. The **RPG system** lets chat attack, heal, poison, summon and even kill him. More ▸

4 Play the chat games

`!first`, `!bomb`, `!fight`, `!slots`, trivia, chocobos and more — most of them win (or lose) Nuts. More ▸

5 Keep the stream going

Subs, tips and cheers extend the **stream timer** and fill the **daily goals**, which spin the Goal Wheel for everyone. More ▸

6 Read the room

If the story-mode icons are lit, Droogle is in a story moment — sounds and redemptions are switched off.

More ▸

▶ Key terms

Nuts — the channel currency (renamed each quarter: DarkNuts, SephiNuts, Deku Nuts…). **Gil** — your Nuts, spendable in the Item Shop. **Pom Poms** — Twitch channel points. **Redemption** — something you buy with Pom Poms. **Special Alert** — an on-stream event triggered by an exact tip or bit amount.

THREE CURRENCIES, ONE SACK

NUTS, GIL & POM POMS

1 NUTS

Each quarter the channel gets a new kind of nut that matches what Droogle is playing (DarkNuts for Kingdom Hearts, SephiNuts for Final Fantasy VII, Deku Nuts for Zelda...). Nuts reset every quarter because **every quarter is a competition**.

Being here pays. All viewers earn nuts every 10 minutes — lurkers included — with bonuses for subscribers and active chatters. Supporting the stream pays even more:

EVENT	NUT BONUS	EVENT	NUT BONUS
Raid	100	Gifted sub(s)	250 per sub
Follow	100	Tip	100 per $1
Sub / resub	250	Cheer	1 per bit

Quarterly competition

Your **Score** combines your Nuts with the hours you've watched this quarter. At the end of each quarter the top 3 scores win prizes (often Amazon gift cards).

`!topnuts` `!tophours` `!topscore` show the top 10. `!sack` shows your own nuts, hours, score and more.

Ways to earn more

Chat games, trivia, Free Nuts, cards, trophies, Overkills, Top Boards and Goal Wheel spins. See every way to earn ▸

2 GIL

Gil is your Nuts, used to buy items in the Item Shop. Type `!sack` to sync your Gil to your Nuts. Buying items spends **both** your Gil and your Nuts, so it lowers your quarterly score — spend wisely! `!inventory` shows your Gil and items.

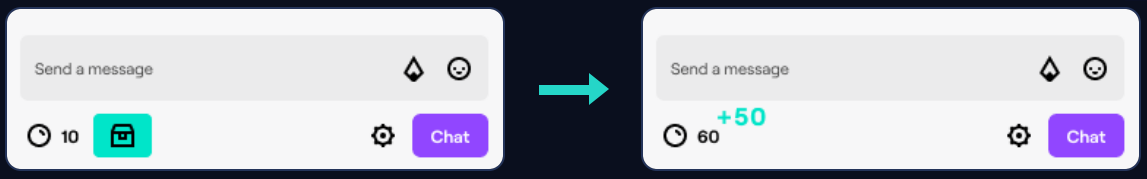

3 POM POMS

Pom Poms are Twitch **channel points**, used for channel point redemptions. You earn them just by watching, plus bonuses below. Pom Poms & Watch Streaks ▸

CHANNEL POINTS

POM POMS & WATCH STREAKS

You earn Pom Poms periodically while you watch. Every so often a click-to-claim bonus appears at the bottom of chat — click it to collect.

Points from following and joining a raid are claimed automatically.

WATCH STREAKS

Watch Droogle's next broadcast to keep your streak alive. Every consecutive stream earns extra points automatically, and streak milestones of **10, 25, 50, 100, 150** and beyond also earn generous **Nuts** rewards!

EARNING ACTION	HOW	POINTS
Watching	Every 5 minutes of live watch time (non-subscribers)	+10
Active watching	Every 15 minutes — click to claim (non-subscribers)	+50
Raid	Joining a raid	+250
Follow	Once, when you first follow	+300
Watch Streak 2	2 streams in a row*	+300
Watch Streak 3	3 streams in a row*	+350
Watch Streak 4	4 streams in a row*	+400
Watch Streak 5+	5 or more streams in a row*	+450
1st Cheer	First cheer on the channel per 30 days	+350
1st Sub Gift	First gifted sub per 30 days (not anonymous)	+500

*Each stream must be at least 10 minutes long, and at least 30 minutes must have passed since the last stream ended.

GET THAT SACK FULL

EVERY WAY TO EARN NUTS

Some of these can also **lose** you nuts — play at your own risk.

!bomb Bomb

Starts a game of Bomb or passes it on. Holding the bomb when it explodes loses nuts — the last person to pass it before it blows earns nuts!

VS

!fight [user] Fight

Pick someone to fight; a random winner gets nuts. Add new weapons to the armory with !weaponadd.

1st

!first First!

Be one of the first three to type it during a stream for a nuts reward.

777

!slots Slots

Spin the channel-emote slots for up to 1,000 nuts with a Super Jackpot. You can also lose nuts.

$

!steal [user] Steal

Try to steal nuts from someone else — but it may backfire on you!

?

Trivia !answer [answer]

A question posts every 15–30 minutes. First correct answer wins nuts; a wrong answer loses nuts. Multiple-choice questions allow one guess each, two guesses total.

Free Nuts

Redeem once per stream for 100 nuts.

Card

Turns Droogle into a Triple Triad card; the card's random values decide your nuts reward.

PlayStation Trophy

Create a custom trophy on stream. Its class decides your reward — a rare Platinum pays 1,000 nuts!

Overkill

Kill Droogle with damage far above his remaining HP for 1,000–2,000 nuts. How ▸

Top Boards

The top 3 Healers, Attackers and Chatters of each stream win nuts at the end of the night. Details ▸

Daily Goals

Each daily goal hit spins the Goal Wheel: 500–2,500 nuts for **everyone** watching. Details ▸

More nut games: Name That Track!, Who's That FF Monster!?, the **Kupo Nut Drop**, the **Tonberry**, the **Stagger Wheel**, Queen's Blood, chocobo races and duels — see **Games**.

HOW LONG DOES DROOGLE STREAM?

STREAM TIMER & EXTENSIONS

Most streams run on a **stream timer** that Droogle strictly follows. Each stream has a minimum (often **4 hours**) and a maximum it can be extended to (often **6 hours**).

The stream extends in **10-minute chunks**. Each 10 minutes usually takes **20 Kupo Nuts**, earned by the community through subs (including gifted), tips, cheers and follows:

SUPPORT	KUPO NUTS
Tier 1 sub	2
Tier 2 sub	5
Tier 3 sub	10
Tip	1 per $1
Cheer	1 per 100 bits
Follows	5 per 5 follows

The **stream timer bar** on the left fills with each kind of support in its own colour. It slides out when support comes in and every 10 minutes, and each notch it fills adds 10 minutes. Mods, VIPs and subscribers can also check with `!streamtimer`.

> **Max it out!** Hitting the maximum extension unlocks a special stream activity — usually a **Marbles On Stream 5-Race Grand Prix** or an episode of **Who Wants To Be A Gillionaire!?**

DAILY GOALS & THE GOAL WHEEL

Every stream has four daily goals (special event streams may differ):

- **5 Follows**
- **10 Subs** — resubs count
- **2,500 Bits**
- **$25 in Tips**

Every goal reached spins the **Goal Wheel** for the whole chat a few seconds later: **500 to 2,500 nuts** for everyone, or a stream extension. If a goal is hit during a Stagger or a summon, the wheel waits until it's over. Hit all four for a **SPECIAL EVENT!**

Bronze Kupo Nut — +10 minutes

Silver Kupo Nut — +20 minutes

Gold Kupo Nut — +60 minutes

Platinum Kupo Nut — maximum extension!

A Kupo Nut from the wheel pours straight into the stream timer bar in its own metal colour.

READING THE STREAM

STORY MODE & THE CHAOS BAR

Interactivity is the heart of this channel, but it can wreck a big story moment. That's why **Story Mode** exists:

Story Mode Lv. 1

Turns off all SFX commands plus most channel point redemptions and special alerts that interrupt the stream. Most RPG redemptions stay on.

Story Mode Lv. 2

Turns off **all** SFX commands, redemptions and alerts.

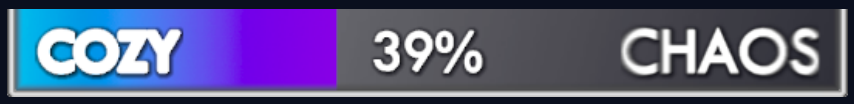

Next to the viewer count, icons light up in colour when something is switched off:

No SFX commands

No channel point redemptions

No special alerts (tips, cheers, subs)

THE COZY / CHAOS BAR

Things go from cozy to **CHAOS** fast around here. Follows, subs, tips, cheers and raids all add chaos — and bigger events add more (a $10 tip beats a $5 tip, a 100-viewer raid beats a 50-viewer raid, Tier 3 beats Tier 1). A busy chat, high viewership and big redemptions like Fireworks, Nosferatu and Suffer add to it too.

As chaos rises, Droogle's UI changes colour… and at **100% CHAOS** you'll get a visit from a very special someone.

SFX COMMANDS SUBS

Over **1,500 SFX commands** — and thanks to randomizers like `!randomsora`, `!randomsnake` and `!randomffvii`, over **10,000 unique sounds**. SFX commands are for **subscribers**. Most have a 10-minute cooldown; some are an hour or even days.

> There's a time and a place! The best SFX emphasize a moment or land a clever joke. Be mindful of the game and what's happening — consistent misuse can cost you SFX access, even as a subscriber.

HEAL HIM OR HURT HIM

THE DROOGLE RPG SYSTEM

Droogle has **9,999 HP** and **99 MP**. Use Pom Pom redemptions and items to heal him, buff him… or bring him to 0 HP. Each stream keeps a **death count** of every time attackers take him down.

	REDEMPTION	TYPE	POM POMS	WHAT IT DOES
	Item Shop	SHOP	5	Buy items for the Use Healing Item / Use Attack Item redemptions. How ▸
	Use Healing Item	HEAL	10	Use a healing item from your inventory. List ▸
	Use Attack Item	HIT	10	Use an attack item from your inventory. List ▸
	Cure	HEAL	750	Restore a portion of HP. Uses 15 MP. Droogle must be alive.
	Cura	HEAL	2,000	Restore a moderate portion of HP. Uses 25 MP.
	Curaga	HEAL	3,000	Restore a considerable portion of HP. Uses 35 MP.
	Curaja	HEAL	5,000	Restore Droogle to full HP! Uses 50 MP.
	Esuna	HEAL	500	Remove all status ailments. Uses 15 MP.
	Regen	HEAL	500	Regen for 5 minutes (cancelled by Poison). Uses 15 MP.
	Attack	HIT	350	Random basic or elemental attack (fire, ice, lightning, water, wind).
	Petrify	HIT	175	Petrify Droogle for one minute!
	Poison	HIT	350	Poison for 5 minutes. Cured by Esuna or an Antidote.
	Silence	HIT	750	Mutes Droogle's mic for 1 minute — live captions take over. Cured by Echo Screen, Esuna or Remedy.
	Confuse	HIT	1,000	Confuse for 3 minutes — random RPG redemptions fire!
	Doom	HIT	1,000	30-second countdown to death. Cured by Esuna or Holy Water.
	Meteor	HIT	2,000	Hit Droogle with a heavy attack!
	Zantetsuken	HIT	3,500	Odin is summoned — chance of instant death!

Heals and attacks earn you RPG EXP — see **levels, elements & Overkill**. Big events like summons and the Stagger are triggered by tips and bits: **Summons**.

ADVANCED RPG

ELEMENTS, LEVELS & OVERKILL

ELEMENTAL DEFENSES

Icons above Droogle's HP bar show his elemental strengths and weaknesses. **Mental Erasers** weaken a random element; **Ward Potions** strengthen one (or remove a weakness). Summon attacks are affected too!

Fire Water Thunder Ice Wind

DEATH & OVERKILL

Bring Droogle to 0 HP and the death counter ticks up. Deal damage far above his remaining HP (2.5× or more — e.g. a Meteor hitting for 150% more than he has left) for an **OVERKILL** and a reward of 1,000–2,000 nuts.

RPG LEVELS

Everyone has a **Healing Level** and an **Attack Level**. Heals and attacks earn EXP — often based on how much you healed or hit. Level-ups are announced in chat.

`!rpglevel` your levels · `!topheal` top 5 healers · `!topattack` top 5 attackers

TOP BOARDS NEW

At the end of every stream, after the credits, three boards are revealed. The top 3 on each win nuts:

BOARD	RANKED BY
Top Healers	Healing done this stream
Top Attackers	Damage dealt this stream
Top Chatters	Messages sent this stream (not commands)

Can't wait for the reveal? During the 3-minute ad break, a card on the pre-show screen shows the current top 3 of each board.

#1	#2	#3
1,000 nuts	**500** nuts	**250** nuts

LIMIT BREAK & OMNISLASH NEW

The bar under Droogle's name is his **Limit gauge**. Every point of damage chat deals fills it — **15,000 damage** fills it completely (instant kills like Doom, Zantetsuken and Zanmato don't count). When it's full it glows, and Droogle can unleash **OMNISLASH**.

Omnislash slashes chat 14 times for 8,000–9,999 each, then finishes with a **9,999** strike. Everyone who helped fill that Limit gauge takes the hit: **500 nuts in total**, split by how much damage you dealt. The more you hurt him, the more it costs you!

Your name is on the line too: every slash cuts an attacker's name in half, and the **top attacker**'s name is blasted to dust by the final strike.

Example split

Attackers dealt 13,000 / 1,500 / 500 damage → they lose **433 / 50 / 17** nuts.

Damage dealt *after* the bar is full doesn't count toward the next one.

SPEND YOUR GIL

REVIVES

Phoenix Down revives Droogle; **Mega-Phoenix** revives him at full HP. The **Phoenix** summon gives him Auto-Life so the next death never happens. Summons ▸

TIP & BIT EVENTS

SUMMONS

Summons are triggered by exact tip or bit amounts. They hit (or protect) Droogle through the RPG system.

SUMMON	TYPE	TIP	BITS	EFFECT
Shiva (FFX)	Offense	$6.60	660	Ice attack · Boost
Leviathan	Offense	$8.88	888	Water attack · Boost
Yojimbo (FFX)	Offense	$9.99	999	Pay-to-slash · Boost · see below
Ramuh	Offense	$11.11	1,111	Lightning attack · Boost
Tonberry	Offense	$13.31	1,331	Walks toward Droogle · chat fights it ▸
Ifrit	Offense	$17.17	1,717	Fire attack · Boost · Burn
Alexander	Offense	$19.19	1,919	Divine Judgment · Boost · see below
Carbuncle	Defense	$16.16	1,616	Pearl Light shield for 20 minutes
Phoenix	Defense	$22.22	2,222	Full HP/MP + Auto-Life

▶ BOOST `!boost`

The offensive summons use the Final Fantasy VIII **Boost** mechanic. When chat announces Boost is active, spam `!boost` as many times as you can before time runs out — every boost adds damage!

Elements matter

Summon attacks are affected by Droogle's elemental defenses. Check the icons above his HP bar — a Mental Eraser before an Ice summon hits harder; a Ward Potion softens it.

YOJIMBO

Like a Stagger, Yojimbo's summon lasts as long as the community wants — and Yojimbo **loves** to be paid, especially in bits. How much you pay decides which attack he (or his loyal dog, Daigoro) uses:

Wakizashi	Minor damage	**Daigoro**	Considerable damage
Kozuka	Moderate damage	**Zanmato**	Instant kill!

Alexander — Divine Judgment

Rises behind the Philly skyline as the studio shakes and the lights go out, then rains holy lasers into the studio for **2,000–3,500 damage**. Boost lasts until the lasers fire: **+40 damage** per `!boost` (max 50).

Carbuncle — Pearl Light

Surrounds Droogle with a shield for 20 minutes that considerably reduces both physical and magical damage.

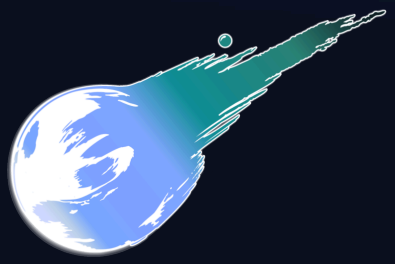

Phoenix — Flames of Rebirth

Restores HP and MP to max and blesses Droogle with Phoenix's wings. If he hits 0 HP, he's instantly revived to full.

COMMUNITY EVENT

FINAL FANTASY VII STAGGER!

A Stagger is the community working together for a **ton of nuts**. Every Stagger attack spins the **Stagger Wheel**, and **everyone in chat** earns whatever it lands on: **250 to 725 nuts**.

START A STAGGER

- Tip $33.33 $44.44 $55.55 or $99.99
- Cheer 3,333 4,444 5,555 or 9,999 bits
- Redeem Final Fantasy VII Stagger for 33,333 Pom Poms (5-day cooldown)

Once the Stagger begins (after the Meteor hits), Droogle's HP drops to 0 and starts regenerating at **125 HP every second**. Every attack knocks it back down by its damage. The Stagger lasts as long as chat keeps his HP below the max of 9,999, and ends a few seconds after it refills.

Normal RPG redemptions are switched off during a Stagger. Damage comes from support instead:

ATTACK	TRIGGER	EFFECT
Basic Attack	100–299 bits · a follow	500–750 damage
Critical Attack	$3+ · 300–499 bits · Tier 1 or Prime sub · 1 gifted sub	1,750–2,000 damage
Slow	$5+ · 500–999 bits · Tier 2 sub · 2 gifted subs	Critical + Slow: regen at half speed for 60 s
Stop	$10+ · 1,000+ bits · Tier 3 sub · 3+ gifted subs	Critical + Stop: regen paused for 60 s

Each support event is one attack. An attack list in the bottom-left corner shows who hit Droogle and with what. Slow and Stop overlap rather than stack, and Stop beats Slow. Stagger hits also charge Droogle's **Limit gauge** at half rate.

The attack list, newest on top

The Stagger Wheel rises in after every attack

SUMMON · $13.31 / 1,331 BITS

THE TONBERRY

Tip $13.31 or cheer 1,331 bits and a Tonberry appears about 6 seconds later. Lantern in one hand, Chef's Knife in the other, it spends **10 minutes** slowly walking toward Droogle. Chat has until then to take it down.

FIGHT IT

▶ ATB FULL? !tonberry

The ATB bar under the Tonberry fills every **30 seconds**. When it's full, the first **5 different chatters** to type !tonberry each land a strike for **500–999 damage** — 900+ is a **CRITICAL**. Then the bar starts filling again.

Hidden HP

Its HP isn't shown. Most Tonberries have **8,000–9,999 HP**, but about 1 in 4 is a tough one with **10,000–12,000**. Bring it to 0 and **everyone in chat earns 1,000 nuts**.

ON THE WAY, IT ATTACKS DROOGLE

Hoppin' Mad minutes 2 & 6

It hops in a rage and rains pots and pans on Droogle's head for **1,000–1,500 damage**.

Scourge minutes 4 & 8

Its lantern drains Droogle's soul for **−50 MP**.

Chef's Knife

If the Tonberry reaches Droogle, it's an **instant KO** — unless Phoenix's wings revive him.

Its walk pauses while the pre-show screen is up during ad breaks. A second Tonberry waits its turn. The summoner gets Top Attackers credit for the damage the Tonberry deals; chat strikes don't count toward EXP or Top Attackers.

CATCH · FEED · RACE · BREED

CHOCOBO STABLES

Build a stable of up to **five** chocobos, raise their speed, race them on stream and breed your way to the legendary **Gold Chocobo**. Everything runs in chat with `!chocobo` plus two channel point redemptions.

The path

1. **Catch** a chocobo with greens.
2. **Name** it and make it your **primary**.
3. **Feed** it greens to raise its speed.
4. **Race** it to earn race wins and loot.
5. **Breed** chocobos to unlock new colours.

Shopping list

ITEM SHOP ITEM	GIL
Gysahl Green	100
Curiel Green	300
Reagan Green	600
Sylkis Green	1,000
Carob Nut (breeding)	1,500
Zeio Nut (breeding)	3,000

Gil = your Nuts. Type `!sack` to sync, `!inventory` to check.

Catching a chocobo

Item Shop + Use Healing Item

1. Type `!sack` so your Gil matches your Nuts.
2. Redeem `Item Shop` and type the green, e.g. *Curiel Green*. Put a number first to buy in bulk: *3 Gysahl Green*.
3. Redeem `Use Healing Item` and type the green's name. One green is used up as soon as the chocobo appears.
4. Chat tells you its **class** and **sex** (wild chocobos are always **Yellow**; male or female is 50/50). You have **30 seconds** to reply **Catch** or **Release**.
5. **Catch** puts it in your lowest empty stable. If all five are full, reply with the stable number (1–5) to **replace** that chocobo, or **None** to let the new one go.

GREEN	WEAK	GOOD	GREAT	WONDERFUL
Gysahl	50%	32%	14%	4%
Curiel	30%	45%	19%	6%
Reagan	20%	45%	25%	10%
Sylkis	10%	40%	36%	14%

CLASS	STARTING SPEED	MAX SPEED
Weak	10–25	150
Good	26–50	190
Great	51–100	230
Wonderful	101–180	255

Class matters twice: it caps how fast feeding can make a chocobo, and it decides what you can breed. Replacing a full stable erases the old chocobo for good. `Use Healing Item` doesn't work during the pre-show or ad breaks.

CHOCOBOS · YOUR STABLE

STABLE COMMANDS

Every stable command asks you a question in chat. Reply with just the number or word it asks for — you have **30 seconds** each time.

!chocobo The menu

Lists your commands: stable, primary, rename, feed, race, breed and release. **!chocobo race** explains how to race (see Racing).

!chocobo stable See all five stables

Shows every stable on one line: name, sex, colour, class, race wins and speed, with your racer marked **(Primary)**. Empty stables say *Empty*.

```
Droogle => ◆ Stable #1 (Primary) - Droop (Male): Yellow | Wonderful | 4 Race Win(s) | Speed: 198 ◆ Stable #2 - Bowboy (Male): Yellow | Great | 0 Race Win(s) | Speed: 126 ◆ Stable #3 - Empty
```

!chocobo rename Name a chocobo

Reply with the stable number, then send the new name — **your next message becomes the name**, spaces and all, so type it carefully (and leave out the # symbol). New chocobos are *Unnamed*. The name shows on stream when you race, and **duels need a named primary**.

!chocobo primary Choose your racer

Reply with a stable number. That chocobo races for you in races and duels; only one chocobo can be primary. If you ever replace or release your primary, pick a new one before you race.

!chocobo release Free up a stable

Reply with the stable number, then **Yes** to confirm or **No** to cancel. The chocobo is gone for good — nothing is refunded.

!chocobo feed Raise speed with greens (5 per stream)

1. Reply with the stable number.
2. Reply with a quantity and a green, e.g. *2 Curiel* or *5 Sylkis* (no number = 1). You must already own the greens.
3. Chat shows the speed change, e.g. *Droop's speed has been raised from 190 to 205!*

GREEN	SPEED PER GREEN	5 AT ONCE
Gysahl	+0 or +1	+0 or +5
Curiel	+1 to +2	+5 or +10
Reagan	+2 to +5	+10 to +25
Sylkis	+5 to +9	+25 to +45

- **One roll per feeding**, multiplied by the quantity — 5 Gysahl is all or nothing.
- **5 greens per stream**, shared by all your chocobos (the count resets when Droogle starts the show). Asking for more than you have left is refused and your greens are returned.
- Speed stops at the class max (150 / 190 / 230 / 255).

Tip: breeding and duels can push a chocobo past its class max — feeding it then drops it back to the max, so don't feed a chocobo that's already over.

RACING & REWARDS

Racing

77 777 1,777 Race Your Chocobo! Your primary races on stream

Cheer exactly **77, 777 or 1,777 bits**, or redeem Race Your Chocobo! (7,777 Pom Poms). Your **primary** chocobo races on screen with its name, rider and colour. **Speed is everything** — the faster your chocobo, the better its odds:

PRIMARY SPEED	77 BITS	777 BITS	POM POMS
240+	3.3%	33%	25%
200–239	2.5%	20%	17%
170–199	2%	14%	12.5%
150–169	1.7%	11%	10%
under 150	1%	9%	8%

PRIMARY SPEED	1,777 BITS
230+	**100%**
200–229	50%
160–199	33%
under 160	25%

- **Win:** your chocobo gets **+1 race win** (wins matter for breeding) and you choose a reward (below). Its speed doesn't change.
- **Lose:** it places 2nd to 6th at random. Nothing changes — try again.
- **At 230 speed or more, a 1,777-bit race is a guaranteed win.** Only Great (max 230) and Wonderful (max 255) chocobos can get there.
- No primary chocobo? The race still plays, but there's nothing to win and the bits aren't returned. Check !chocobo stable first.
- Race as often as you like — but please don't spam them, since every race takes over the screen.

Winner's reward

Pick 1 of 4

After a win, chat offers **four choices**. Reply **1**, **2**, **3** or **4** within **60 seconds** (no reply = no reward).

Options 1–3: items

Three different random items, **1–5 of each**, from: Hi-Potion, Tent, X-Potion, Mega-Phoenix, Remedy, **Sylkis Green**, **Zeio Nut**, a Ward Potion, Prism Powder, Bomb Core, Dragon Scale, Electro Marble, Arctic Wind, Raven's Yawn, Toadstool, Shrivel, Mental Eraser or Graviball.

Option 4: nuts

1,000, 2,000, 3,000, 4,000 or 5,000 nuts — random each time, so check the offer before you pick.

CHOCOBOS · BREEDING & DUELS

BREEDING, DUELS & STATS

`!chocobo breed` Unlock Blue, Green, Black & Gold

1. Reply with the first stable number, then the second. They must be **opposite sexes**.
2. Reply **Carob** or **Zeio** — the nut you'll breed with (buy them in the Item Shop).
3. Confirm with **Yes**. Chat announces the baby's colour and class.
4. Reply with the stable number to put it in, or **None** to release it.

What decides the baby

Four things: the parents' **colours**, their **classes**, their combined **race wins** (duel wins don't count) and the **nut**. The recipes are yours to discover — experiment, or follow the FFVII breeding guide.

Baby speed comes from the parents: their speeds added together, divided by 1.75 (max 255). It starts with 0 wins and no name.

▶ Guaranteed starter combo

A **Great** Yellow + a **Wonderful** Yellow, a **Carob Nut** and **4 race wins** between them always gives a **Blue or Green** chocobo.

- The parents stay exactly as they were.
- **The baby replaces whatever is in the stable you pick** — choose an empty one!
- Saying **No** (or picking two chocobos of the same sex) returns your nut. Running out of time doesn't.

`!chocorace @user` Race someone for 500 nuts

Challenge another chatter's primary chocobo. They have **60 seconds** to type `!accept` or `!decline`. Both of you need **500 nuts** and a **named** primary chocobo.

SPEED LEAD	0	20	50	75	100	125+
Faster chocobo wins	50%	65%	82%	92%	98%	100%

Each chocobo scores its speed plus a random 0–125; the higher score wins.

- The winner takes **500 nuts** from the loser (or whatever the loser has left).
- Both chocobos get faster: winner **+2 or +3**, loser **+1 or +2** (max 255).
- One duel at a time, then about a **10-minute** rest before the next.

`!chocobo stats @user` Scout someone's primary

Shows that chatter's primary chocobo: name, colour, speed and wins. Handy before you challenge them.

PLAY ALONG

GAMES & CHALLENGES

Name That Track! 200 Pom Poms

A song plays behind a hidden album cover. Type `!guess [title]` with the title — typos and a missing word are fine. First right answer wins **500 nuts**. Final Fantasy, Kingdom Hearts and Chrono tracks. 10 seconds into the song, blanks for each letter appear, and a quarter of them fill in by the 30-second mark.

Who's That FF Monster!? 200 Pom Poms

A monster or boss appears in silhouette. Type `!guess [name]` — first right answer wins **250 nuts**. Letter-blank hints appear in the last 15 seconds.

Final Fantasy Battle! 50 Pom Poms

Two random Final Fantasy characters fight — wager your Pom Poms on the winner. New fighters join all the time.

Roster ▸

Card 500 Pom Poms

Droogle becomes a Triple Triad card with your message on the back. The card's values decide your nuts. `!bestcard` shows your best.

PlayStation Trophy! 175 Pom Poms

Name a custom trophy and it pops on stream. Bronze, Silver, Gold… a rare **Platinum** pays 1,000 nuts.

Moogle Mailbox 200 Pom Poms

Send Droo the Moogle a letter — a gaming-news question or anything you want Droogle's take on. Letters are read on stream during the Moogle Mailbox segment.

Who Wants To Be A Gillionaire!? 50 Pom Poms

Redeem **Add Gillionaire Question** with your question, four choices, the answer and a difficulty (1–4) — the redemption shows the exact format. If it's used in the game you earn **250 nuts**.

FF Tier Ranker

Droogle ranks a random Final Fantasy category — songs, summons, final bosses, Cids, airships — from S to F. Back-seat ranking in chat is encouraged.

▶ Max-extension events

Push the stream timer to its maximum and the night ends with a special event — usually a **Marbles On Stream** 5-race Grand Prix or an episode of **Who Wants To Be A Gillionaire!?**

COLLECT THEM ALL

QUEEN'S BLOOD

Redeem `Queen's Blood` (250 Pom Poms) to add a random card from FFVII Rebirth's card game to your collection. Rarer cards are worth more points, and points set your rank.

`!qb`	Create your deck, or see your rank and the collection link
`!topqb`	Top 10 collectors by points
`!qbsell`	Pick a card by number (e.g. #67 or #125B), see its nut value, then reply Yes or No
`!qbgift`	Gift a card (names are case-sensitive). Needs **Lv. 5**; 1 gift per day; they need a deck
`!qbtrade`	*[user] [your card] for [their card]*. Needs **Lv. 8**; 1 trade per day each
`!qbaccept / !qbdecline`	Answer a trade within 5 minutes
`!qbreset`	Wipe your whole collection (asks to confirm)

Full collection: **tinyurl.com/qbcollection** · Refunded during the pre-show and ad breaks.

HYPE MOMENTS

Nut showers

While live, every follow, sub, gift, tip, raid and 50+ bit cheer showers **all viewers** with 50–250 nuts. During a Stagger, attacks spin the **Stagger Wheel** instead.

Hype Train

Reach **level 5** and everyone watching gets **5,000 nuts**.

Raids

Raiders get 100 nuts and a hype welcome — a 5+ viewer raid sets off the full raid animation.

RANDOM EVENT · GAMEPLAY SCENE

KUPO NUT DROP

Every 10–30 minutes while Droogle is live and playing a game (but not in Story Mode), Droo the Moogle flies across the screen **5 times**, dropping one Kupo Nut on each pass. Every drop's nuts are numbered **1 to 5**.

CATCH ONE

▶ **CALL YOUR NUT**

Type `!kupo [#]` with the number on the nut — e.g. `!kupo 3`. First one to call a nut catches it and their name takes its place. You can catch **one nut per drop**, so pick wisely. A nut can still be called for **5 seconds** after it falls off screen, to cover stream delay.

WHAT THEY'RE WORTH

Each nut's metal is rolled on its own. The rarer the metal, the faster it falls.

	NUT	NUTS	CHANCE	FALLS
	**Bronze**	50	50%	Slowest
	**Silver**	100	30%	Faster
	**Gold**	250	15%	Faster still

Scare alerts

Scare Tips (Lv. 1–3) and the Final Fantasy Scare Alerts (via the Sound Alerts extension) are jump-scares for Droogle. `!scaretips` lists them in chat.

Cait Sith Limit Break

Cait Sith throws 2–6 real 3D dice (more dice for bigger amounts). Damage is the total × 100, multiplied by your best match: doubles ×2, triples ×3, all the way up to ×6. Your damage also charges Droogle's Limit Break.

WHAT'S NEW

PATCH NOTES

November 2026

Nov 7 **Summon Alexander** ($19.19 / 1,919 bits) — the holy fortress rises behind the Philly skyline, the studio shakes and the lights go out, then **Divine Judgment** rains into the studio for 2,000–3,500 damage. Boost the whole way up with !boost . Details ▸

Nov 6 Daily goals now spin the **Goal Wheel** on their own a few seconds after they're hit (waiting until any Stagger or summon is over), and a met goal glows on the bar. A Kupo Nut won on the wheel pours its minutes straight into the stream timer. Details ▸

Nov 6 Follows now count toward the stream timer: every **5 follows** add 5 Kupo Nuts toward the next 10 minutes.

Nov 6 The **Kupo Nut Drop** no longer drops while Story Mode is on.

Nov 5 **Stagger rework**: every attack spins the new **Stagger Wheel** for 250–725 nuts to everyone in chat. Damage is randomized (Basic 500–750, Critical 1,750–2,000), an on-screen list shows every attack, Droogle's HP regenerates live in his HUD, and the Stagger ends on its own once he's back to full. Details ▸

Nov 5 **Sleep** (250 Pom Poms) sends Droogle to Dreamland: the screen goes hazy and purple while he snoozes. Five different chatters type !wake to wake him (Esuna and Remedy work too). **Blue Screen of Death** moves to the !bluescreen chat command, once every 30 minutes.

Nov 5 A brand-new **stream timer bar**: a glass tube that fills in a colour for each kind of support and celebrates every +10 minutes. It stays out of the way during Staggers. Details ▸

Nov 5 **Cait Sith** now throws real 3D dice with true odds. Matching dice glow red and multiply the damage, from doubles ×2 all the way to ×6. Details ▸

Nov 5 Fixes: one viewer could take two places on Top Healers, and Droogle himself no longer takes a leaderboard spot. Droogle's HP now drops the moment a hit lands, and the LOST plane crashes behind the buildings again.

Nov 3 **Summon Tonberry** ($13.31 / 1,331 bits) — it slowly walks toward Droogle with a Chef's Knife. Fill its ATB bar and strike with !tonberry before it gets there; beat it and **everyone in chat earns 1,000 nuts**. Details ▸

Continued on the next page ▸ earlier updates.

November 2026 (cont.)

Nov 3 **Kupo Nut Drop**: every so often during gameplay, Droo the Moogle flies in and drops five numbered nuts. Catch one with !kupo [#] for up to **500 nuts**. Details ▸

Nov 3 **Final Fantasy Battle!** runs on a new overlay: HP bars slide down as damage lands and the winner message is easier to read.

Nov 3 Fixed a random-number bug: **Name That Track!** and **Who's That FF Monster!?** now pick from their whole lists (only the first half ever came up before), and Omnislash damage uses its full range.

Nov 3 The **Chocobo** guide is now complete: every command has its own section with catch odds, feeding gains, race win chances by speed, rewards and duel odds. Race rewards, a breeding message and feeding an empty stable were also fixed. Details ▸

Nov 3 During the 3-minute **ad break**, a leaderboard card on the pre-show screen shows who's leading **Top Healers, Top Attackers and Top Chatters** so far this stream. Details ▸

Nov 2 **Omnislash** gets personal: each slash now cuts an attacker's name in half, and the top attacker's name is disintegrated by the final strike. Details ▸

Nov 1 **Who's That FF Monster!?** now pays **250 nuts** (up from 100). Both guessing games wait until the show starts — redeem one during the pre-show and your channel points come straight back.

Nov 1 **FF Tier Ranker**: song boards now pause the background music so you can hear every clip.

Nov 1 Droogle now has a **Limit Break**! Every attack fills his Limit gauge — when it's full he can unleash **Omnislash** on the chatters who charged it. Details ▸

Nov 1 Letter hints! **Name That Track!** shows a blank for every letter 10 seconds into the song, with a quarter of the letters filled in by 30 seconds. **Who's That FF Monster!?** does the same in its last 15 seconds.

Nov 1 **Name That FF Track!** is now **Name That Track!** — Kingdom Hearts, Kingdom Hearts II, Chrono Trigger and Chrono Cross join the Final Fantasy pool, with full 30-second clips and 5 extra seconds to guess.
